2 TIMES PER WEEK (UNLESS EXPERIENCING A PROBLEM)

- ✓ Eye Check Water level - water temperature - water clarity
- ✓ Test Sanitizer & pH level in water – Add chemicals if needed

IF CHLORINE IS 0, ADD 1 FULL CAP OF CHLORINE CONCENTRATE – IF IT IS .5, ADD ½
CAPFUL ** IF TOTAL ALKALINITY IS 80, ADD 5 CAPS OF TA INCREASER ** IF PH IS 6.0,
ADD 5 CAPS PH INCREASER ** IF PH IS 8.0, ADD 5 CAPFULS 2PH DECREASER.

WEEKLY

- ✓ Fill Chlorine or Bromine
- ✓ SHOCK water with Spa Shock Treatment for moderate

MONTHLY

- ✓ Remove filter Cartridge, SPRAY wash clean AND REINSTALL
- ✓ Drain Spa if water smells, is cloudy or chemical readings are way off
- ✓ Add Stain and Scale Control

PREVENTATIVE RECOMMENDATIONS

- ✓ Bring water sample to Pool Doctor Store every month for a complete analysis
- ✓ Add 1 CAP Spa Shock Treatment after EVERY use or if water is not clear OR SMELLS
- ✓ Replace cartridges after 2 years
- ✓ Call for our monthly or once every 2 months spa service program
- ✓ Drain and re-fill spa with fresh water every 3-4 months
- ✓ USE MINERAL PURIFIER AND REDUCE SANITIZER USAGE

CHEMICAL INFORMATION: Add CHEMICALS to water with jets on

- ✓ Chlorine / Bromine Sanitizers (2-4ppm IDEAL): KEEps water safe & SANITIZED
- ✓ pH Increase (7.2-7.5 IDEAL): Raises pH
- ✓ pH Decrease & Muriatic Acid: Lowers pH & total Alkalinity
- ✓ Total Alkalinity Increaser (125-150ppm IDEAL): Raises total Alkalinity
- ✓ Calcium Hardness Increaser (250ppm IDEAL): Raises Calcium
- ✓ Stain and Scale Control: Removes metals & prevents staining
- ✓ NON CHLORINE Shock Treatment: Oxidizes contaminates in water

FYI

- ✓ Cloudy Spa water should improve within 3 days – Run system 24hr/day
- ✓ Have drips repaired immediately
- ✓ Bromine and Chlorine ARE Sanitizers – Ozone is just an Oxidizer and DOES NOT Sanitize
